Our updated Pontoon/Tritoon Dolly design is great for displaying and storing pontoons safely. Use it to move or store pontoons in your shop, your showroom, or at a tradeshow in addition to many other uses. The highlight of our new design is a very high density closed cell foam which creates a much more supported bunk for your pontoon to rest on, as it will gently shape to the weight of your pontoon. The new design is also more compact. The swiveling hard synthetic 5" casters are both durable and heavy duty, rated at 1000 lbs each. During the design process aesthetics were a priority. The black powder coated frame and casters are attractive yet will not detract attention from the pontoon, instead blending into the floor.

Assembly is required.

*Please note 1 order is for a single Pontoon/Tritoon Dolly.
